

# Allyn Fincher

## OBJECTIVE

My art reflects my interests in literature and history. Expression of simple forms and lines guides my artistic decision making.

## ARTIST STATEMENT

---

With my art, I express the beauty I see in simple lines and forms. My work does not strive to represent, but rather to express the way I see the world. From simple curves of the human body to the vivid hues of a landscape, I want the viewer to see beauty of the mundane. I believe the story itself is not the product, but how it is told makes the difference. My advantage of starting to make art later in life is that I already know the stories, heard the music, but I still explore new ideas.
